### **DETAILED ACTION**

This application claims priority to provisional application Serial No. 60/270047.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32 and 52 drawn to compositions comprising administering ingredients herein, classified in class 424, subclass 401 for example.
- II. Claims 33-38 drawn to a method of inhibiting separation of a pigmented cosmetic composition comprising method steps herein, classified in class 424, subclass 401 for example.
- III. Claims 39-51 drawn to a method of preparing a pigmented cosmetic composition broadly, classified in class 424, subclass 401 for example.

Group I and II are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are separate and distinct each from the other since Group I is drawn to compositions comprising administering ingredients herein whereas Group II is drawn to a method of inhibiting separation of a pigmented cosmetic composition comprising method steps herein. Therefore, Group I and Group II are two separate and distinct since they have different modes of operation.

Inventions Group I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the

process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the invention Group III is seen to broadly teach a method of making a pigmented cosmetic composition generally, not specific compositions in Group I. The method for making could be used to make a materially different product than compositions in Group I such as different pigments, emulsifiers, preservatives, and vitamins in cosmetic compositions

The search for all inventions would place an undue burden on the Office in view of the diversity of the medical disorders to be treated and the corresponding diversity in the field of search for each.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P Sec. 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Jiang whose telephone number is (703)305-1008. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.
